FACULTY LEGISLATION: The following legislation has been passed by the General Faculty and/or Faculty Council. I recommend approval.

1. The Faculty Council at its meeting on June 21, 1965, approved the recommendation of the College of Arts and Sciences to change requirements in certain degree programs (D&P 3541-45).

The Department of Classics under Bachelor of Arts, Plan I, under "C. Majors and Minors," under Greek, changes the major requirement from thirty semester hours (with courses specified) to fourteen semester hours of Greek beyond the sophomore level; and under Latin the major requirement is changed from thirty semester hours (with courses specified) for those beginning Latin in college or twenty-six semester hours above the freshman level to those entering with Latin credits, to fourteen semester hours beyond the sophomore level. This is done because beginning with the 1965-66 year the freshman courses in Greek and Latin will be given in two sequences, the regular sequence and an accelerated sequence. In either language, as the student goes to the next higher course he may shift from one sequence to the other provided he is advised to do so by his instructor and the undergraduate adviser. The revised way of stating the major requirement removes the inconsistency between the catalogue statement of the major requirement and the new parallel sequence of courses, and provides for calculating the student's major average from grades made on upper division courses only, so that the student whose work improves as the semesters go by is not penalized for his slow start. The number of semester hours does not change.

The Department of Linguistics has restated its requirements for a major, first minor, and second minor to simplify the present statement of requirements, to reflect better the present status of linguistics as a well defined area of study with its own techniques and principles, and to enrich the specialized part of the Bachelor of Arts program, and to do so by a sequence of required courses covering the essential part of linguistics. There is no change in number of semester hours.

The Department of Romance Languages has made changes in the requirements for the major, first minor, and second minor in both Spanish and French majors to bring the degree program in each closer to the level of programs at other institutions. The choice of two plans in the first minor would liberalize it and provide flexibility for a variety of student programs. The first option in the first minor is the present requirement, while option two provides for numerous humanistic and professional programs around a Spanish or French core. There is no change in number of semester hours.

Under the Requirements for the Degree of Bachelor of Science in Architectural Studies, the prescribed semester hours in architecture are reduced from fifty-five to fifty-three; the junior year courses eliminate three semester hours elective in arts and sciences and adds courses in Architecture. The revisions are recommended to update the curriculum as reviewed and approved by the Architecture Faculty, December 18, 1964, and to meet some of the recommendations of the National Architectural Accrediting Board. The revisions also better correlate courses in the Five and Six-Year Programs being offered concurrently by the School of Architecture.

2. The Faculty Council at its meeting on June 21, 1965, approved the recommendation of the College of Business Administration (D&P 3528) regarding the application of ROTC courses toward the Degree of Bachelor of Business Administration, which permits nine hours for lower division free electives, and three hours to be substituted for speech. The proposed change is designed to adjust permissible credits in ROTC courses to the curricula changes approved in the College.

3. The Faculty Council by the circularization procedure approved on June 21, 1965, changes in the College of Education Catalogue (D&P 3548-50). This legislation restates teacher certification requirements to meet legal requirements therefor in Texas.

It also reduces from a maximum of eighteen to a maximum of nine semester hours the military or naval science courses that may be used as free electives in any degree plan, thereby increasing the number of courses the student may take in the humanities, natural sciences, social sciences, mathematics, and fine arts.

In the Degree of Bachelor of Science in Education (for Secondary School Teachers), the curriculum has three components, one of which is a basic core of liberal studies, called academic foundations, which are set out on page 18 of the 1964-66 Catalogue, the last two numbered items of which include philosophy, Art 305, Drama 314, Music 302L, Bible, and the second, fine arts, humanities, social sciences, mathematics, and natural sciences. The present legislation would provide that a student registering for twelve semester hours or more must include a minimum of nine semester hours of courses other than the last numbered item specified above, rather than in the last two items, the reason being that the present restriction on registration has made it most difficult to find courses for freshmen who attended a summer session prior to long session enrollment.

Other legislation raises the grade-point average necessary in specializations in order to enroll in practice teaching courses. This reflects the higher requirement in grade-point average for academic specialities previously established by the faculty of the College of Education and the University Council on Teacher Education.

Also Business is added as a single subject field specialization to make it possible for students to be certified to teach business as well as another academic specialization. Under existing requirements students may not be certified to teach more than one subject if they elect a specialization in business. Two Single-Subject Field Specializations must be completed. In this section this legislation also calls attention to the fact that economics, geology, health education and psychology are not yet recognized for teacher certificates in Texas, and the student should check with his dean concerning regulations in other states. Requests come from school districts in Texas and other states for teachers in these specializations.

The legislation further provides for the inclusion of chemistry and physics under subject concentrations for the Bachelor of Science in Elementary Education since these additions will strengthen the offering of academic minors for majors in Elementary Education.

The Requirements for the Degree of Bachelor of Science in Physical Education reduces from fifteen to nine semester hours the requirements in natural and biological sciences and eliminates six semester hours from philosophy, Music 302L, Art 305, Drama 314, Speech 305, or Bible. These changes are proposed so as to provide more flexibility within the program and to allow free electives for the students. It also rearranges the content of courses in physical and health education.

4. The Faculty Council on June 22, 1965, approved by the circularization procedure the proposal to change from ten to six the number of semester hours of ROTC courses that may be applied to the degree of Bachelor of Architecture for the Five Year Program, and these to be only as free nonadvanced electives and only in the case of the student who completes successfully the junior and senior years of the ROTC program. (D&P 3551)

5. The Faculty Council on June 25, 1965, approved by the circularization procedure the proposal of the School of Law (D&P 3552) which subjects the transfer student to the same standard of work requirements as if he had completed his first year of study in that school. Presently he is governed by the requirements for freshman law students which means that if his work falls below 63, he is dropped from the School of Law, and after being out for two semesters, is permitted to re-enter as a beginning student. On the advanced student basis he is allowed to take re-examinations in courses in which he made less than 65, and when his overall average is 65 once more, he is in good standing and does not lose credit in courses he passed. The faculty feels that the present rule is too harsh on the transfer student.

OUTSIDE EMPLOYMENT: I recommend that the person listed below be permitted to undertake the outside duties specified, the work to be arranged so as not to interfere with University assignments and otherwise to conform to Chapter III, Sec. 13, of Part I of the Rules and Regulations of the Board of Regents for the Government of The University of Texas:
